# Hearing Conservation Program

# Hearing Loss Prevention Program For Village of Springville

## Purpose

This Hearing Loss Prevention Program is designed to protect employees from the effects of exposure to excessive noise at (The Village of Springville) and comply with the OSHA Noise Standard, 29 CFR 1910.95.

## Noise Areas and Measurements

Noise measurements were taken of the following areas or equipment at our plant or workplace:

<u>Area, equipment or job duties</u>	<u>Noise level in decibels</u>		
Chipper	Max 104.3	Min 91.3	
Chain saw			
Cut of saw			
Compressor (trailer)	Max 82	Min 72	6/11/21
Street sweeper			
Bobcat (breaker)			
Blower at Water Shop	Max 108.1	Min 105.3	6/14/21
Lawn mower			
Sewer cleaner			
Weed Trimmer			
Pump room WWTP			
Compressor room WWTP			
Air tool DPW			
Utilavac	Max 99.1	Min 60	6/11/21
Jack hammer	Max 114	Min 47	6/11/21

(Date of noise measurements)

Noise level measurements were taken with Extech SL510 Sound Level Meter

## Hearing Protection Used at The Village of Springville

The following hearing protection is provided to employees at (Add your company name) (list at least two kinds). Employees will be allowed to select their choice of hearing protection in the size that fits them correctly.

<u>Brand name of hearing protection</u>	<u>Sizes available (where applicable)</u>
MSA, 3M	Multiple sizes Foam style plugs.
Moldex	33dB, rubber corded style one size 31dB

Hearing protection is available from the following person(s) or at the following locations:  
All Leadman. They are located in every shop and in all vehicles.

Hearing protection is required in the following locations, job duties or when the following equipment is used:

In any situation that is using heavy equipment, power tools or buildings that are on the list from page 3.

## Audiometric Testing at the Village of Springville

Audiometric testing will be provided at no cost to all employees whose noise exposure equals or exceeds an 8 hour average of 85 decibels who have the following positions or work at the following locations:

---

All areas of the Department of Public Works. All unionized employees.

---

---

---

---

---

---

---

---

---

---

Optional: (some employers decide or find it easier to cover all employees who might be overexposed to high noise sometime during their employment)

In addition, audiometric testing will also be provided to all employees working in the following areas or in the following job classifications:

---

---

---

---

---

---

---

---

---

---

Audiometric testing will be provided upon first assignment to a high noise area or within 180 days of assignment. These initial test results are the baseline results. Annual testing following these initial tests will be compared to the baseline test results for all employees who continue to work in high noise areas.

[person name or position] will schedule audiometric testing for employees

For baseline tests, employees will be instructed to avoid unprotected exposure to high noise levels at least 14 hours before testing is done.

If a standard threshold shift (*a drop in hearing ability of at least 10 decibels in three frequencies – 2000, 3000 or 4000 hertz*) is found, the employee may be retested within 30 days. (note: retesting is optional)

Employees will be provided with results of their individual audiometric exams. If a standard threshold shift is found, employees will be notified in writing within 21 days of determination.

If a standard threshold shift is found in any employees, the following will also be done:

- The employee not wearing hearing protection will be provided them.
- The employee already using hearing protection will be re-fitted and re-trained.
- The employee will be referred to audiologist or ear, nose & throat specialist for further evaluation.
- The employee will be informed of a need for an ear exam if a medical cause unrelated to noise exposure is suspected.

Audiometric testing will be conducted by a licensed or certified audiologist, ear, nose & throat physician (otolaryngologist) or audiology technician certified by the Council of Accreditation in Occupational Hearing Conservation (CAOHC).

Audiometric testing is conducted by Universal Audiology (716 662-8102).

## Training

Training will be provided to all employees exposed to noise above an 8-hour average of 85 decibels. Training will cover the following topics:

- The effects of noise on hearing
- The purpose of hearing protectors, the advantage and disadvantages of various types, and instructions on how to use and care for them,
- The purpose of audiometric testing and how it is done,
- Employee access to records.

Our training program is described as follows:

A combination of DVD video and online training through Perma. Also, the doctor, giving the audio test will explain best use of hearing protection and proper fitting.

---

---

---

---

---

---

---

---

For questions related to noise or audiometric testing, employees can see The Superintendent of Public Works.

### **Access to Records**

Noise measurement records can be viewed at the following location(s) or obtained from the following person(s):  
At the DPW 30 Nason Blvd. from the Superintendent of Public Works.

---

---

---

Personal audiometric exam results will be given or mailed directly to individual employees tested.
